

HOPE AND MEMORY

A WORKSHOP ABOUT THE POLITICS OF NARRATING THE PAST
AND ANTICIPATING THE FUTURE

MAY
25-26 **2023**

In recent decades, there has been growing awareness that the way in which societies remember past events and write their own history is influenced by political dynamics. Public manifestations and debates around the longstanding legacies of colonialism, slavery and racism highlight the challenge of constructing collective memory in a way that includes the perspectives of those who have experienced exclusion and oppression. Notably, how a community narrates a shared history is crucial not only for its self-understanding in the present but also shapes its relation to the future.

Against this background, this workshop will reflect on the myriad ways in which our relation to the past and to the future are intertwined. In so doing, we start from the assumption that a society's memory of its own past is subject to public debate and political struggle as much as its vision of a shared future.
